Email: [gagansday@gmail.com](mailto:gagansday@gmail.com)

Whatsapp: [+91 85728 10100](https://wa.me/+918572810100)

Up-to-date version of CV is available at <https://cv.gagandeepsingh.dev/>

I'm a Laravel expert with 9+ years of experience in PHP web development. I have extensive experience supporting and developing applications from scratch on the Laravel framework for existing businesses and startups. I see myself as a relentless problem-solver, and I care for better frontend and backend architecture (including DevOps solutions) for better application programming standards, interface, and performance.

I am looking to cooperate with clients and companies to build a strong, long-lasting relationship that we can both grow from. I always like to make suggestions that will help the project move as efficiently as possible, because I want my clients to be 100% satisfied with the end result and the time it took to get there

If you are looking for someone to bring your ideas to life, or for someone to be a part of your development team feel free to contact me. Let's create something awesome together!

## Technical Skills
